Equipment intended for potentially explosive atmospheres and the European Market **IMQ-EPIL AGREEMENT: NEW OPPORTUNITIES FOR IRANIAN COMPANIES INTERESTED IN EXPORTING EX EQUIPMENT TO EUROPE**

Thanks to the agreement signed between IMQ - a leading body for conformity assessment activities in Europe and a notified body for the European Atex directive - and EPIL - a testing laboratory accredited by NACI according to ISO/IEC 17025 - it will be much easier now for Iranian manufacturers of EX equipment to reach the European market.

The agreement between the two companies is in fact based on the recognition by IMQ, of the test results carried out by EPIL, for the issue of the EU-type certificate (CE0051) according to the ATEX European directive, that is necessary in order to market the EX products within the European Union.

An opportunity that means cost and time benefits for companies, even considering they have a local laboratory as a partner for testing.

TESTINGS CARRIED OUT BY EPIL ARE
RECOGNIZED BY  FOR THE PURPOSE
OF RECEIVING THE EU-TYPE CERTIFICATE
FOR THE ATEX EUROPEAN DIRECTIVE
